DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 4-6, 14-18 and 28, drawn to headgear apparatus, classified in class 128, subclass 207.11.
- II. Claims 7-13, 19-27, drawn to cushion apparatus, classified in class 128, subclass 206.19.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination (**group II**) as claimed does not require the particulars of the subcombination (**group I**) as claimed because the cushion can be attached to the face or any other part of human body by other method other than the use of headgear as claimed. The cushion can be attached to the face using adhesive or any other method of attachment. The subcombination (**group I**) has separate utility such as a way of attaching eye protector to a face.

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or

Art Unit: 3772

divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species:

Species of Group I (Headgear):

- 1. Figures(s) 6-8**
- 2. Figure(s) 9-11c**
- 3. Figure(s) 43 and 44**

Species of Group II (Cushion):

- 1. Figure(s) 12-19**
- 2. Figure(s) 20**
- 3. Figure(s) 22**
- 4. Figure(s) 23-24**
- 5. Figure(s) 25**
- 6. Figure(s) 26**
- 7. Figure(s) 32-37**
- 8. Figure(s) 38-42**

The species are independent or distinct because one set of species claims the headgear of a mask and the other set of species claims the cushion of a mask. The applicant must either elect one of the two groups of species. If the applicant elects the headgear of the mask, the applicant must further elect one of the 3 species listed under headgear. However if the applicant elects the cushion of a mask, the applicant must further elect one of the 8 species listed under the cushion.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In

Art Unit: 3772

either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
